The Shipping Connector
## Addon for Microsoft Dynamics NAV

Dynamics NAV Versions: 5.0, 2009 SP1&R2, 2013(R2), 2015, 2016, 2017 – **Languages:** English – **Countries:** Any
Price: Contact us for pricing information

The Shipping Connector is a fast, proven, and cost-effective way to integrate Microsoft Dynamics NAV with any installed carrier software.

Pre-built connectors already exist for **UPS World Ship, FedEx Ship Manager, USPS Endicia, Purolator** and more.

Benefits include:

- Increased shipping speed and accuracy.
- Time and resources saved in the warehouse.
- Tracking numbers and exact shipping charges viewable in real time.
- No more manually entering ship-to addresses into carrier software.
- No more typing tracking numbers into NAV.

Store and pass account billing information

The Shipping Connector accommodates:

- Bill recipient
- Third-party billing
- Blind shipments

Freight Mark-up

- Create mark-up rules globally or specific to a customer, carrier, or service.
- Offer free freight for orders exceeding a specified invoice total.

Optional rate quoting and address verification

Add the option to quote rates and verify ship-to address. Carriers charge a fee to correct address misspellings and missing address information, such as apartments or suites. Fail to mark an address as "Residential" when applicable and a penalty is charged.

If orders are to be paid by credit card, a freight line must be in place before a credit card authorization is requested. Rate quoting allows users to add a freight line before the shipment is processed. Simply enter the number of packages, package dimensions, and weights, and users may shop freight charges for various services offered by carriers.
